EDUCATION

Vellore Institute of Technology (VIT), Vellore, B.Tech in Computer Science & Business Systems 2025 – 2029
CGPA: 9.34

EXPERIENCE

Game Developer & Technical Core, CodeChef-VIT 2025 – Present

- Developed the Clueminati 4.0 game, a timed mystery and puzzle game played at CodeChef-VIT's Clueminati 4.0 event (Godot, GDScript).
- Built Frog Maze Run, a 3D procedural maze game with custom lighting, firefly movement, and mystery-orb power-ups (Godot, GDScript).
- Built the frontend for the chapter's sponsor outreach platform, used to pitch corporate sponsors for major campus events (React, TypeScript, Tailwind CSS).

PROJECTS

DishaVaani | Python, RAG, open-source LLMs, classical ML, Bhashini API, GPS

- Hands-free, location-aware audio guide that narrates India's lesser-known heritage monuments using GPS and compass bearing with RAG-powered LLMs.
- Delivers narration in native languages via Bhashini, with an offline-capable ML recommender that sends travel suggestions over SMS and WhatsApp.

Breadcrumbs | Python, PyTorch, HuggingFace Transformers, scikit-learn, Sentence-Transformers

- Privacy-first audio stress journal that transcribes voice entries locally and tracks stress trends over time for matched therapists.
- Classifies stressor severity across 8 domains with a fine-tuned DistilBERT model and TF-IDF classifiers.

Clueminati 4.0 Game | Godot, GDScript

- Timed mystery and puzzle game built for CodeChef-VIT's Clueminati 4.0 event.

Sponsor Outreach Mail Sender | React, TypeScript, Tailwind CSS

- Frontend for CodeChef-VIT's automated sponsorship platform, streamlining pitch emails and sponsor tracking across major campus events.

The Last Light | Unity, C#, URP

- 3D narrative adventure about restoring memories through objects in the world, with a dual-house teleport mechanic. Built in a 36-hour hackathon.

Frog Maze Run | Godot, GDScript

- 3D procedural maze game with custom lighting, firefly movement, and mystery-orb power-ups.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, JavaScript, TypeScript, C#, GDScript, SQL, HTML, CSS
- **Frameworks and libraries:** React, Tailwind CSS, PyTorch, HuggingFace Transformers, scikit-learn, Sentence-Transformers, Pandas
- **AI/ML:** RAG pipelines, open-source LLMs, NLP classification (DistilBERT, TF-IDF)
- **Game dev:** Unreal Engine, Unity, Godot

ACHIEVEMENTS

- Rank 9 in the B.Tech Computer Science & Business Systems course at VIT Vellore.
- Won Best Freshers at IEEE-CS's Hackbattle hackathon.
